ABSTRAK

Tujuan Penelitian

Pelaksanaan rekam medis pasien rawat inap di Rumah Sakit TK. III dr.Reksodiwiryo Padang belum memenuhi SOP dalam hal ketidakterisian berkas rekam medis maupun keterlambatan pengembalian berkas rekam medis. Tujuan penelitian ini adalah mengetahui informasi pelaksanaan rekam medis pasien rawat inap di Rumah Sakit TK. III dr.Reksodiwiryo Padang tahun 2021.

Metode

Penelitian menggunakan desain penelitian kualitatif dengan pendekatan sistem input, proses, dan output. Informan penelitian berjumlah 7 orang yang ditentukan melalui teknik *Purposive Sampling*. Data dikumpulkan dengan cara wawancara mendalam, observasi lapangan, dan telaah dokumen.

Hasil

Berdasarkan hasil penelitian dari aspek input jumlah tenaga rekam medis mencukupi, belum ada dana khusus, ada SOP, sarana dan prasarana belum mencukupi. Aspek proses pada pencatatan pasien khususnya untuk pencatatan lembar masuk dan keluar belum lengkap. Pengolahan rekam medis belum maksimal, saat proses penyimpanan rekam medis terjadi *misfile*.

Kesimpulan

Pelaksanaan Rekam Medis Pasien Rawat Inap di Rumah Sakit TK. III dr.Reksodiwiryo Padang masih memiliki kekurangan dan membutuhkan perbaikan. Permasalahan pada aspek input kurang pelatihan dalam menunjang kegiatan pengelolaan rekam medis, aspek proses pencatatan seluruh item belum terisi oleh tenaga kesehatan yang bersangkutan, keterlambatan penyerahan rekam medis. Disarankan kepada pihak Rumah Sakit untuk ketersediaan input lebih tercapai, serta proses sesuai SOP sehingga output tercapai.

ABSTRACT

Objective

The inpatients medical records implementation at TK. III dr.Reksodiwiryo Padang Hospital has not fulfilled the SOP in terms of incompleteness in filling out the medical record files as well as delays in returning the files. The purpose of this study was to find out information on the inpatient medical records implementation at TK. III dr.Reksodiwiryo Padang Hospital in 2021.

Method

The research uses a qualitative research design with an input, process, and output system approach. The informants were 7 people who were determined through the purposive sampling technique. Data were collected by means of in-depth interviews, field observations, and document review.

Result

Based on the input aspect result, the number of medical record personnel is sufficient, there is no special allocation funds, there are SOPs, the facilities and infrastructure are not sufficient. The process aspect of patient recording, especially for patient's recording forms, is not complete. Process of medical records has not been maximized, during the process of storing medical records, misfiles occurs.

Conclusion

The Implementation of Inpatient Medical Records in TK. III dr.Reksodiwiryo Padang Hospital in 2021 is still lacking and needs improvement. The input aspect is lack of training in supporting medical record management, the recording process aspect for all items have not been filled in by all the health personnel, delays in submitting medical records. It is recommended to the hospital for the inputs availability to be more achieved, as well as the process according to SOP so that the output is achieved.
