ABSTRAK

Latar Belakang. COVID-19 adalah penyakit yang disebabkan oleh virus corona yang menjadikan pandemik di seluruh dunia termasuk Indonesia. Wabah COVID-19 pertama kali terdeteksi di Wuhan, Cina, pada Desember 2019, dan berkembang dengan cepat. Peningkatan jumlah kasus COVID-19 yang dilaporkan ke WHO dari hari ke hari menunjukkan bahwa rantai penularan virus tersebut belum terputus oleh perilaku pencegahan. Pengetahuan, persepsi, dan sikap masyarakat berpengaruh besar terhadap perilaku pencegahan dari wabah virus corona ini. Tujuan. Tujuan dari penelitian ini adalah untuk melihat gambaran kepatuhan lansia dalam penerapan protokol kesehatan di era covid-19 di rw 06 kelurahan pasie nan tigo. Metode yang digunakan adalah metode deskriptif kualitatif dengan pendekatan studi kasus, data dikumpulkan dari hasil observasi, wawancara dan dokumentasi yang dilakukan kepada lansia yang hadir pada kegiatan mitigasi bencana. Jumlah sampel pada penelitian ini berjumlah 3 orang dengan pengambilan sampel dengan teknik *random sampling*. Pengetahuan seluruh lansia di rw 06 kelurahan pasie nan tigo memiliki pengetahuan cukup baik terkait protokol kesehatan di era covid-19. Sikap seluruh lansia di rw 06 kelurahan pasie nan tigo memiliki sikap positif dalam menerapkan protokol kesehatan di era covid-19. perilaku lansia dalam penerapan protocol kesehatan kurang baik, karena lansia tidak mematuhi protocol kesehatan di era covid-19. kepatuhan lansia terhadap protocol kesehatan kurang baik, karena lansia masih tidak menerapkan protocol kesehatan di era covid-19

**CASE STUDY: OVERVIEW OF ELDERLY COMPLIANCE IN
IMPLEMENTATION OF HEALTH PROTOCOL IN THE COVID-19 ERA IN RW
06 KELURAHAN PASIE NAN TIGO**

ABSTRACT

Background. COVID-19 is a disease caused by the corona virus which has become a pandemic throughout the world, including Indonesia. The COVID-19 outbreak was first detected in Wuhan, China, in December 2019, and is growing rapidly. The increasing number of COVID-19 cases reported to WHO from day to day shows that the chain of transmission of the virus has not been broken by preventive behavior. People's knowledge, perceptions, and attitudes have a big influence on prevention behavior from this corona virus outbreak. Destination. The purpose of this study was to see a description of the compliance of the elderly in the application of health protocols in the era of covid-19 in rw 06 kelurahan pasie nan tigo. The method used was a qualitative descriptive method with a case study approach, data were collected from observations, interviews and documentation conducted. to the elderly who attend disaster mitigation activities. The number of samples in this study amounted to 3 people with random sampling technique. Knowledge of all the elderly in rw 06, patient and tigo sub-district, has quite good knowledge regarding health protocols in the covid-19 era. The attitude of all the elderly in rw 06, patient and tigo sub-district, has a positive attitude in implementing health protocols in the covid-19 era. The behavior of the elderly in implementing health protocols is not good, because the elderly do not comply with health protocols in the Covid-19 era. Elderly compliance with health protocols is not good, because the elderly still do not apply health protocols in the Covid-19 era
