ABSTRAK

Nia Audia, No. BP. 2020841004, Kapabilitas Satuan Tugas Penanganan Covid-19 Dalam Penanggulangan Covid-19 Di Kota Padang, Program Magister Administrasi Publik, Fakultas Ilmu Sosial dan Ilmu Politik, Universitas Andalas, Padang, 2021. Dibimbing oleh: Dr. Roni Ekha Putera, S.IP., M.PA dan Dr. Desna Aromatic, S.AP., M.AP. Tesis ini terdiri dari 162 Halaman, 11 buku teori, 2 buku metode, 34 Artikel Jurnal, 7 dokumen, dan 13 website resmi.

Tesis ini bertujuan untuk menganalisis Kapabilitas Satgas Penanganan Covid-19 Dalam Penanggulangan Covid-19 di Kota Padang. Penelitian ini dilatarbelakangi oleh Kota Padang yang memiliki tingkat penyebaran Covid-19 yang cukup tinggi. Kota Padang mampu menekan laju angka penyebaran Covid-19 ketika penerapan kebijakan Pembatasan Sosial Berskala Besar. Namun lonjakan kasus Covid-19 kembali terjadi ketika kebijakan New Normal mulai diterapkan di Kota Padang. Oleh karena itu kapabilitas Satgas Penanganan Covid-19 sangat dibutuhkan dalam upaya penanggulangan Covid-19.

Teori yang digunakan dalam penelitian ini adalah Kapabilitas Pemerintah Lokal dan Manajemen Bencana Oleh Bevaola Kusumasari, yaitu; Kelembagaan, Sumber Daya Manusia, Implementasi Kebijakan, Keuangan, Teknis, dan Kepemimpinan. Jenis penelitian ini yaitu kualitatif dengan pendekatan deskriptif. Teknik pengumpulan data wawancara dan dokumentasi. Informan dipilih menggunakan teknik *purposive sampling*. Analisis data yang digunakan adalah pengumpulan data, reduksi data, penyajian data, dan penarikan kesimpulan. Validitas data menggunakan triangulasi sumber.

Hasil penelitian menunjukkan bahwa Satgas Penanganan Covid-19 Kota Padang telah berperan dengan baik dalam penanggulangan Covid-19 di Kota Padang. Akan tetapi ada beberapa hal yang perlu untuk dimaksimalkan terkait dengan kapabilitas Satgas Penanganan Covid-19 di Kota Padang. Pertama di variabel Sumber Daya Manusia, mengenai sumber daya tenaga kesehatan dan juga fasilitas pelayanan kesehatan untuk penanganan kesehatan bagi penyintas Covid-19 di rumah sakit daerah Kota Padang masih perlu untuk ditingkatkan. Kedua pada variabel teknis, yaitu dalam hal logistik Covid-19 masih terdapat beberapa masyarakat penyintas Covid-19 yang tidak menerima bantuan logistik ketika isolasi mandiri Covid-19 di rumah, selain itu Satgas Penanganan Covid-19 juga masih perlu untuk memaksimalkan koordinasinya dalam hal menyampaikan informasi terbaru terkait perkembangan Covid-19 ke masyarakat.

Kata kunci : Bencana, Kapabilitas, Satgas Penanganan Covid-19

ABSTRACT

Nia Audia, No. BP. 2020841004, The Capability of the Covid-19 Handling Task Force in Combating Covid-19 in the City of Padang, Masters Program in Public Administration, Faculty of Social and Political Sciences, Andalas University, Padang, 2021. Supervised by: Dr. Roni Ekha Putera, S.IP., M.PA and Dr. Desna Aromatica, S.AP., M.AP This thesis consists of 162 pages, 11 theory books, 2 method books, 34 journal articles, 7 documents, and 13 official websites.

This thesis aims to analyze the Capability of the Covid-19 Handling Task Force in Combating Covid-19 in the City of Padang. This research is motivated by the City of Padang which has a fairly high rate of spread of Covid-19. The city of Padang was able to reduce the rate of the spread of Covid-19 when implementing the Large-Scale Social Restriction policy. However, the spike in Covid-19 cases occurred again when the New Normal policy began to be implemented in the city of Padang. Therefore, the capability of the Covid-19 Handling Task Force is very much needed in efforts to overcome Covid-19.

The theory used in this research is Local Government Capability and Disaster Management by Bevaola Kusumasari, namely; Institutional, Human Resources, Policy Implementation, Finance, Technical, and Leadership. This type of research is qualitative with a descriptive approach. Interview data collection techniques and documentation. Informants were selected using *purposive sampling technique*. Data analysis used is data collection, data reduction, data presentation, and drawing conclusions. Data validity uses source triangulation.

The results showed that the Padang City Covid-19 Handling Task Force had played a good role in handling Covid-19 in Padang City. However, to be capable, there are still several things that need to be maximized by the Covid-19 Handling Task Force in improving its performance results in dealing with Covid-19. The capability of the Covid-19 Handling Task Force is proven by the division of roles and tasks. Regarding the Covid-19 handling funds, the City of Padang has also been adequate and the Covid-19 Handling Task Force uses Covid-19 funds based on a priority scale. In addition, the attitude of the Head of the Covid-19 Handling Task Force can also be categorized as a responsive and responsive leader. In terms of Covid-19 logistics, the Covid-19 Handling Task Force is also going well, although there are still some Covid-19 survivors who do not receive logistical assistance when Covid-19 self-isolation at home. As for the resources of health workers and also health service facilities for handling health for Covid-19 survivors at the Padang City regional hospital, it still needs to be improved. In addition, the Covid-19 Handling Task Force also still needs to maximize its coordination in terms of conveying the latest information regarding the development of Covid-19 to the public.
