Abstract

This study aims to: (1) analyze the amount of added value generated from coconut into VCO, (2) know the system of wage sharing (Labour share) labor in KWT Bengke Sakato. This research was conducted from February 10, 2021 to March 10, 2021. The method used in the study is the case study research method. The data used consists of primary data and secondary data. Data collection is conducted by census by interview to key informants, namely KWT chairman, labor and suppliers of raw materials. Data analysis for the first purpose uses quantitative data analysis in the period of one production cycle, and for the second purpose uses qualitative descriptive analysis. The results of the study showed that coconut oil agro-industry conducted by KWT Bengke Sakato provides added value of IDR 77,651.24,- with a value-added ratio of 82.83% and a profit of IDR 52,251.24,- with a profit rate of 71.15%. The ratio of coconut oil agroindustry added by KWT Bengke Sakato is > 40% meaning that the value-added ratio is relatively high. The system of labor wage distribution is a system of wage distribution by time in the form of nominal wages by setting an average wage of IDR 10,000,- per hour of work and the number of hours worked each labor maximum for 8 hours. Based on the results of the research, the advice that can be given is KWT Bengke Sakato further increase the production of VCO and increase the number of workers so that there resulting benefits can help the economy of the working family.

Keywords : Virgin Coconut Oil (VCO), Value Added, Labour Share
