

CHAPTER V

CONCLUSION

1.1. Conclusion

This study was conducted to provide empirical evidence regarding the effect of Public Governance, Internal Control, and Organizational Culture on Nagari Financial Management Performance in 5 Nagari of Lima Kaum Subdistrict. Based on the results of data analysis and discussions related to research on the variables mentioned, the following conclusions can be drawn:

1. Public Governance has a positive effect on Nagari Financial Management Performance in 5 Nagari of Lima Kaum Subdistrict.

There is a positive and significant influence between Public Governance and Nagari Financial Management Performance in 5 Nagari of Lima Kaum Subdistrict.

2. Internal Control has a positive effect on Nagari Financial Management Performance in 5 Nagari of Lima Kaum Subdistrict.

There is a positive and significant influence between Internal Control and Nagari Financial Management Performance in 5 Nagari of Lima Kaum Subdistrict.

3. Organizational Culture has a positive effect on Nagari Financial Management Performance in 5 Nagari of Lima Kaum Subdistrict.

There is a positive and significant influence between Organizational Culture and Nagari Financial Management Performance.

4. Public Governance, Internal Control, and Organizational Culture together have a positive effect on Nagari Financial Management Performance in 5 Nagari of Lima Kaum Subdistrict.

There is a positive and significant influence between Public Governance, Internal Control, and Organizational Culture as together and Nagari Financial Management Performance.

1.2. Research Limitations

This research has been endeavored to be carried out properly and in accordance with scientific guidelines. However, this study still has some limitations that can be used as a reference for further research. In order to obtain better results, the following are some of the limitations of the study:

1. This study uses a questionnaire as a data collection technique so that the data provided only describes the opinion of the nagari apparatus in 5 nagari offices in the Lima Kaum sub-district on Nagari Financial Management Performance. Therefore, the researcher does not have control over the answers or opinions of the nagari apparatus in 5 nagari offices in the Lima Kaum sub-district which do not show the actual situation. In addition, the answers given in the questionnaire may be biased due to differences in views between each respondent and the researcher.
2. The respondents of this study were limited to the nagari apparatus in 5 nagari offices in the Lima Kaum sub-district so that this study could not describe the entire phenomenon that occurred in the related variables.
3. From the findings in this study, there are other factors that affect Nagari Financial Management Performance in addition to the variables of Public Governance, Internal Control and Organizational Culture.

1.3. Suggestions

Based on the conclusions and limitations of the research mentioned above, the suggestions that can be proposed by researcher are as follows:

1. For Nagari Government in 5 Nagari Offices in Lima Kaum Sub-District.
 - b. Because the researchers found that the average score given by respondents on the statement items for the Organizational Culture variable was still low, there needs to be an effort to increase the aggressiveness and teamwork in the work of the nagari apparatus in 5 nagari offices in the Lima Kaum sub-district.
 - c. The Nagari Government is expected to intensively disseminate information on the Nagari financial management information system and provide adequate facilities so that the performance of Nagari financial management performance can be more optimal.
 - d. Because the researchers found that the average score given by respondents on the statement items for the Organizational Culture variable was still low, the nagari government is expected to always put the interests of the group first in formulating and establishing work programs.
 - e. The nagari government is expected to always keep abreast of the rapidly changing developments of the nagari financial application system and conduct regular socialization of the nagari financial application system to the nagari apparatus. In

addition, the nagari government is expected to quickly improve the financial application system which is often problematic in order to optimize the performance of the nagari's financial management.

2. For the Next Researcher

- a. This study shows that only 86.7% of the variables influence Public Governance, Internal Control and Organizational Culture on Nagari Financial Management Performance. The remaining 13.3% is influenced by other variables besides Public Governance, Internal Control and Organizational Culture. For this reason, for future research, it is recommended to add variables other than the variables mentioned above in order to strengthen the given hypothesis.
- b. In distributing questionnaires, it should be done face to face and adding interviews with respondents so that researchers can better understand the questions and answers given so that more accurate research results can be obtained.
- c. This study only had 65 respondents so that the population coverage in this study was still very narrow. For this reason, future research is recommended to use more respondents, not only in nagari but also in the district or province.
