Abstract

This study was conducted with the aim of knowing, analyzing and obtaining empirical evidence about auditor ethics, auditor experience, integrity, and auditor personal characteristic in audit quality of auditors in public accounting firms in the city of Padang. The number of samples in this study were 24 auditors from several public accounting firms in Padang, the data were processed using the Statistical Package for Social Sciences (SPSS) version 22. The method of data collection was a survey method using a questionnaire that was given directly to the auditor and returned to the author. The results of the analysis conclude that auditor ethics does not have a positive effect on audit quality, but in this study, auditor experience, integrity, and personal character of auditors have a positive effect on audit quality.

Keywords: Auditor Ethics, Auditor Experience, Integrity, and Personal Characteristic in Audit Quality
