Gambaran Persepsi Lansia dalam Mengikuti Vaksin Covid-19 di Wilayah Kerja
Puskesmas Ambacang Kota Padang Tahun 2021

ABSTRAK

Rendahnya capaian vaksin Covid-19 pada lansia disebabkan karena lansia memiliki beragam persepsi terkait vaksin Covid-19. Lansia mengatakan mereka tidak percaya Covid-19, tidak percaya vaksin Covid-19, hingga takut meninggal setelah disuntik vaksin. Tujuan penelitian ini untuk mengetahui persepsi lansia dalam mengikuti vaksin Covid-19 di wilayah kerja Puskesmas Ambacang Kota Padang. Penelitian ini merupakan penelitian deskriptif dengan pendekatan kuantitatif. Sampel penelitian berjumlah 296 lansia yang belum divaksin Covid-19. Penelitian dilakukan dengan wawancara terpimpin dan pengisian kuisioner. Analisa data yaitu analisa univariat untuk melihat distribusi frekuensi persepsi lansia dalam mengikuti vaksin Covid-19. Lansia memiliki persepsi positif 53,4% dan persepsi negatif 46,6%. Diharapkan lansia di wilayah kerja Puskesmas Ambacang agar selalu mencari informasi terbaru mengenai vaksin Covid-19 dari sumber yang terpercaya seperti tenaga kesehatan atau layanan kesehatan contohnya Puskesmas, sehingga lansia bisa membedakan mana informasi yang benar dan informasi yang salah.

*Overview of Perceptions of the Elderly in Participating in the Covid-19 Vaccine
in the Work Area of the Ambacang Health Center, Padang City in 2021*

ABSTRACT

The low achievement of the Covid-19 vaccine in the elderly is due to the fact that the elderly have various perceptions regarding the Covid-19 vaccine. The elderly said they did not believe in Covid-19, did not believe in the Covid-19 vaccine, and were afraid to die after being injected with the vaccine. The purpose of this study is to find out the perception of the elderly in following the Covid-19 vaccine in the working area of Ambacang Health Center in Padang City. This research is descriptive research with a quantitative approach. A sample of 296 studies was obtained from guided interviews and questionnaire filling. Data analysis uses univariate analysis to see the distribution of elderly perception frequency in following the Covid-19 vaccine. The elderly have a positive perception of 53.4% and a negative perception of 46.6%. It is hoped that the elderly in the working area of the Ambacang Health Center will always seek the latest information about the Covid-19 vaccine from trusted sources such as health workers or health services such as Puskesmas, so that the elderly can distinguish between correct information and incorrect information.
